

Sanitary Reversing Valve

Sanitary Reversing Valve	
Body Material	ASTM, 304/1.4301, 316L/1.4404
Working Pressure	10 bar
Working Temperature	130°C
Gaskets	EPDM, FPM, HNBR, FDA177.2600
Size	DN25/1" - DN100/4"
Surface treatment	sandblasting, polishing
Configuration options	position sensor, control unit

Features

1. Accurate and precise movement
2. High degree of automation, stable and reliable work.
3. complex structure with drive and cooling system.
4. Petal type structure is simpler, and is mostly used in production processes with smaller flow rates.

Applications

The INOXCN GROUP CORPORATION' s sanitary reversing valve, a manual adjustment of the position and manually implement on opening and closing of reversing valve, can be used in a variety of beverages, food, cosmetics, wine and other various occasions.
