

IC 1001 Stainless Steel 1PC Ball Valve With Lock

1PC ball valve and flange gate valve is the same type of valve, the difference is that its closing member is a sphere, the sphere around the center line of the valve body for rotation to open, close a valve. The ball valve is mainly used for cutting off, distributing and changing the flow direction of the medium in the pipeline.

DN	NB	Inner diameter of thread (mm)
